CAREER OBJECTIVE

As a result of my studies in Information Technology, I aim to work on programming and deepen my knowledge in this field. I aspire to enhance my abilities beyond their current level. I am eager to learn new things and receive advice to further improve myself.

EXPERIENCES

Volunteer at the NSM   2020 - 2022

Work as a volunteer to take care of exhibitions and visitors, facilitating and giving advice about the event.

Mini data science bootcamp   Oct 2023

Teach about MS Excel, sql database and dashboard and report in bootcamp online.

Training Low code   Dec 2023

Start practicing creating appilcation with AppSheet.

PROJECTS

Created Website with node.js   July 2023

Create a website for buying and selling clothes, incorporating features such as adding products to the cart, making payments, printing receipts, and connecting the database to MySQL in XAMPP. The website includes a login and registration system for both users and developers.
